

## The Time Is Right

The beat is strong and when you dance  
You take complete control of me  
The time is right so take a chance  
When everyone you know can see  
The music plays and people move  
They love the sound of rock and roll  
The time is right for you to do  
A dance with me that everybody knows

The beat is strong when the time is right  
And the time is right when the time is right  
The music plays for the time is right  
And the time is right and everybody's down  
The time is right when the time is right  
And the time is right so the time is right  
The time is right when the time is right  
And the time is right now

Time we use but just a few  
Moments with you is not enough  
Here the band and when we dance  
Baby you make me feel tough  
Well that's when the time is right  
The time is right is right now

The girls look good, they're everywhere  
They do it all so naturally  
The time is right and if you dare  
You'll be the one to dance with me  
The lights are on and here we go  
You take a step and spin around

The time is right to move in close  
We jump up the everybody's down  
Down, down, down down

The beat is strong when the time is right  
And the time is right when the time is right  
The music plays for the time is right  
And the time is right and everybody knows

Cha, cha chamone, chamone, chamone girl  
Like, like, Jo Jo, Jo Jo, get back

The time is right when the time is right  
And the time is right so the time is right  
For the time is right when the time is right  
Well the time is right and everybody's down  
The time is right when the time is right  
And the time is right so the time is right  
The time is right when the time is right  
And the time is right now

Time is free for you and me  
Dancing while we're making love  
Never miss another kiss  
Baby you make me feel tough  
Well that's when the time is right

The time is right, the time is right  
Time is right, the time is right  
Time is right, the time is right now  
The time is right, the time is right  
Time is right, the time is right now  
The time is right now
